WAN Configuration

Select the connection type to connect to your ISP. Clickit

Internet Connection Type : Static IP Dynamic IP PPPoE PPTP HSDPA/UMTS

3.5G

SIM PIN: None

Retype SIM PIN:

APN:

Username:

Password:

PHONE Number:

Always
 Dial on demand
 Idle: (1 ~60 Minutes)
 Manual

DNS

DNS : No Default DNS Server Specify DNS Server IP

Primary: . . .

Secondary: . . .

First attach your USB dongle to the USB port on the router. In the web interface go to "IP Config" and click on "WAN". Select the HSDPA/UMTS radio button. Enter the APN, the above example is for the 3 network, details for the other major networks are shown below. Leave the phone number set to *99#, this applies to all networks.

Orange:

Username: leave blank
 Password: leave blank
 APN: orangeinternet

Vodafone:

Username: web
 Password: web
 APN: internet

O2 PAYG:

Username: o2bb
 Password: password
 APN: m-bb.o2.co.uk

O2:

Username web
 Password web
 APN: mobile.o2.co.uk

T-mobile:

Username: leave blank
 Password: leave blank
 APN: general.t-mobile.uk

3

Username: leave blank
 Password: leave blank
 APN: 3internet

Now go to "Log and Status" then "Network Configuration" and you should see the details of your connection.
