

The EPD-5818 adopts PoE components to work as a power device. It provides PoE function to devices which have no built-in PoE function.

By supplying 48V from Power Source Equipment to EPD-5818, it will transfer into 12V power out and transmit data rate to devices without PoE function.

Application Diagram

Product Highlight

1. The power supply can be centrally located where it can be attached to uninterruptible power supply
2. Power can be supplied over long distance
3. Power can be available wherever network access is available

Product ID

1. Brick type mechanical design with power indicator (Red LED).
2. Dimension: 82 x 46 x 21mm

Operation Environment

1. Operation temperature: 0°C~ +60°C
2. Storage temperature: -40°C~ +80°C
3. Humidity: 5% ~ 95% typical
