

Slotted Horizontal Polarised Omni Antenna 12dBi

WL-ANT-012HON

Slotted 12dBi Gain Wireless LAN Omni
Antenna with 2.4GHz to 2.5GHz
Frequency

This Slotted antenna delivers extended access point range using horizontal polarization. The advantages of horizontal polarization are increased range over flat surfaces (reduced multi-path effects), and dramatically reduced interference from other wireless users who are normally using vertical polarized signals.

Technical information

Frequency: 2400 - 2483MHz

Gain: 12 dBi

Polarization: Horizontal

Beamwidth beg: Horz 7 degrees Vert. 360 degrees

SWR: 1.5 : 1

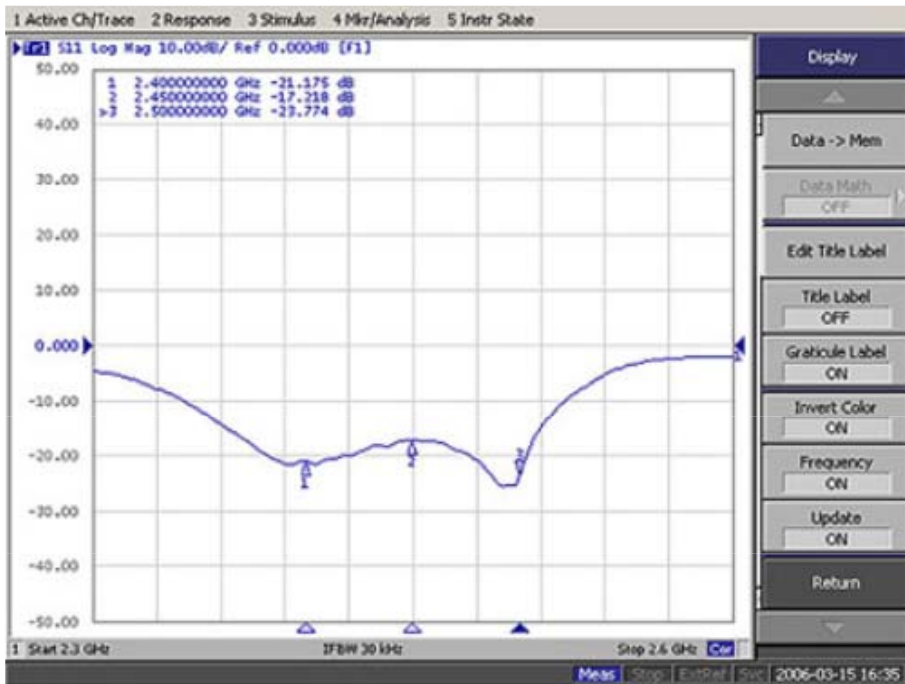

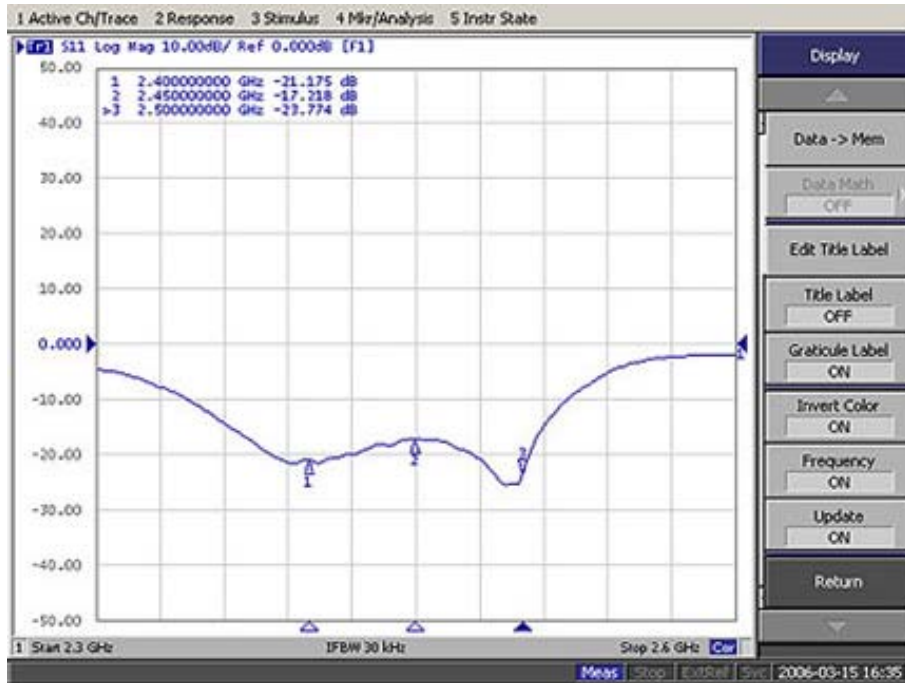

Connector: N-Female, Socket

Size: L800xW100xH50

Weight: 1700g

Mount: N/A

SWR
