

Setting up the WL-USBWIFIRPT-3000 using an iPad

This assumes you have an outdoor USB wifi adapter connected to the WL-USBWIFIRPT.

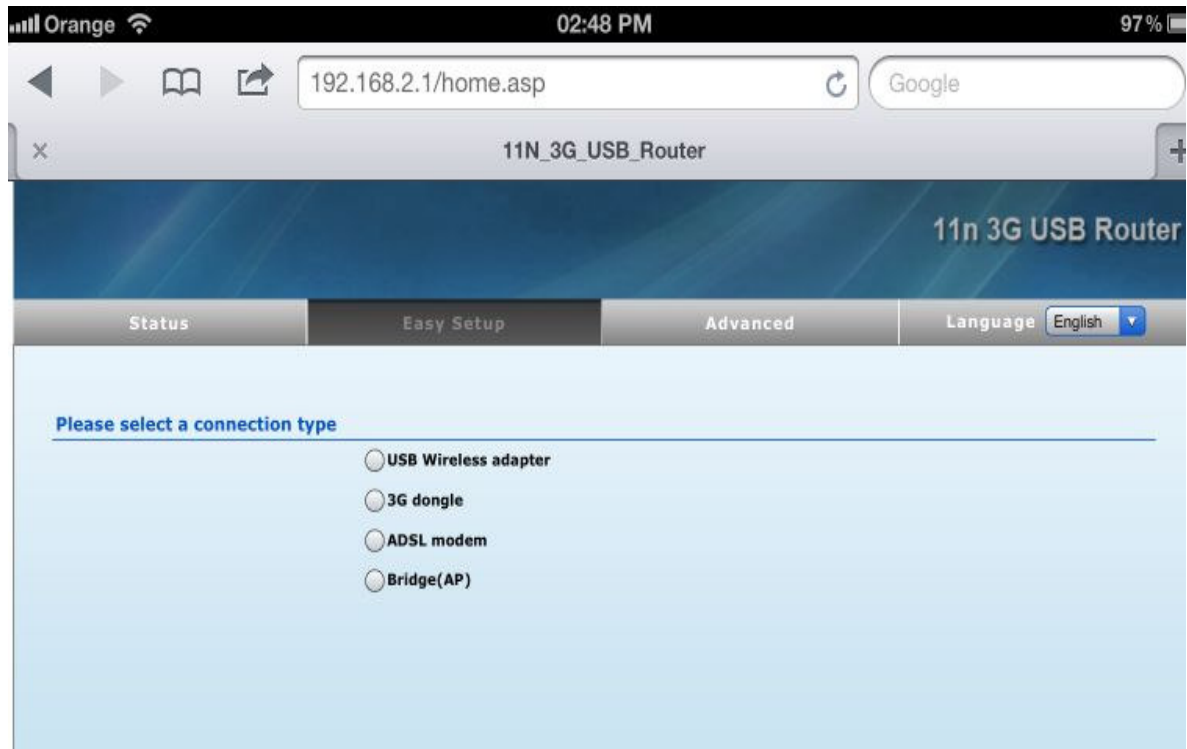

1. In Settings on the iPad go to Wi-Fi and connect to 11n 3G Router AP.

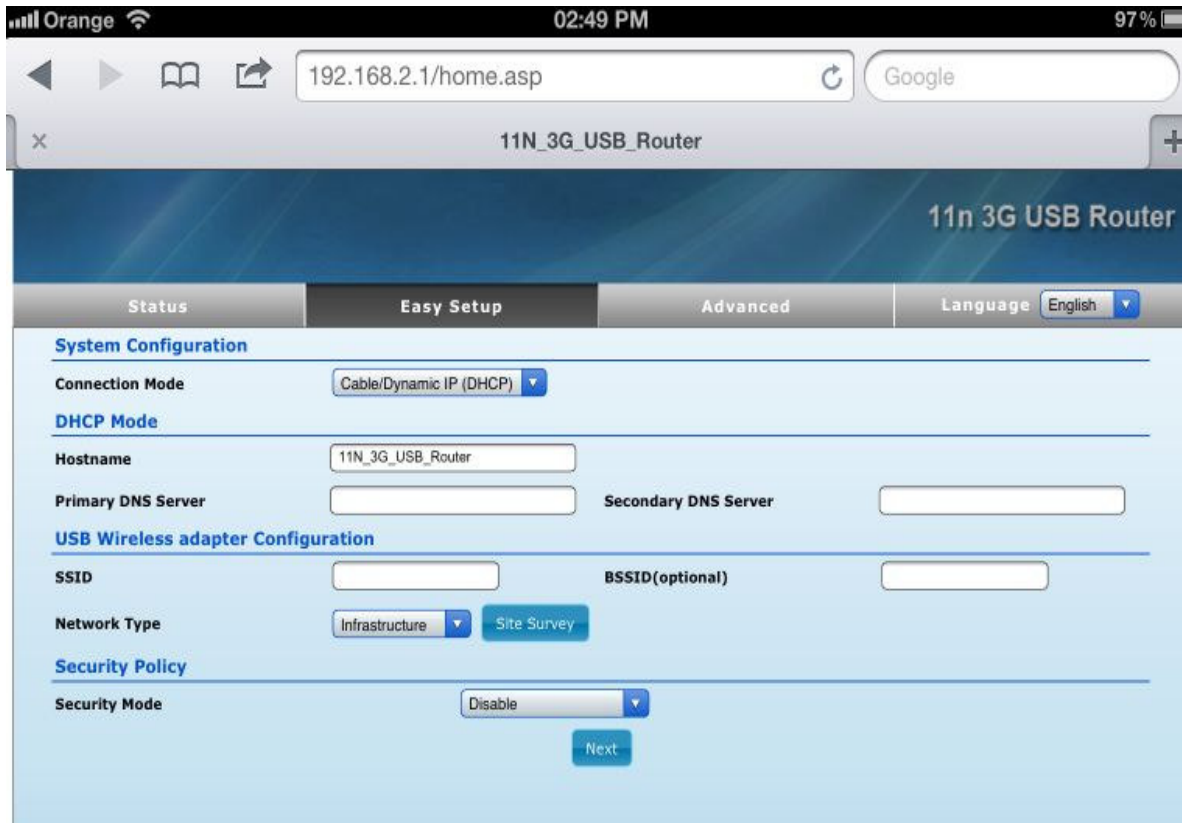

2. Open Safari and in the address bar enter **192.168.2.1**, you should see a page like below, click on "Easy Setup".

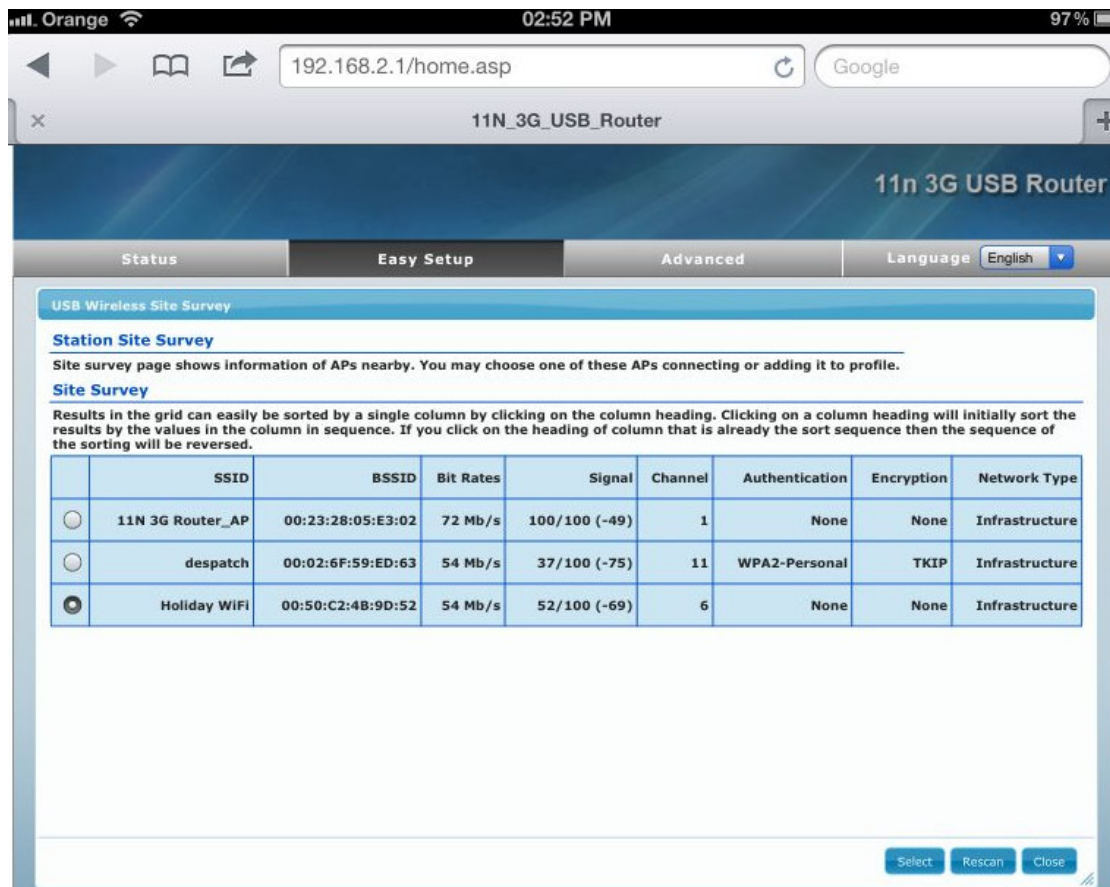

3. Click in the radio button “USB Wireless adapter”.

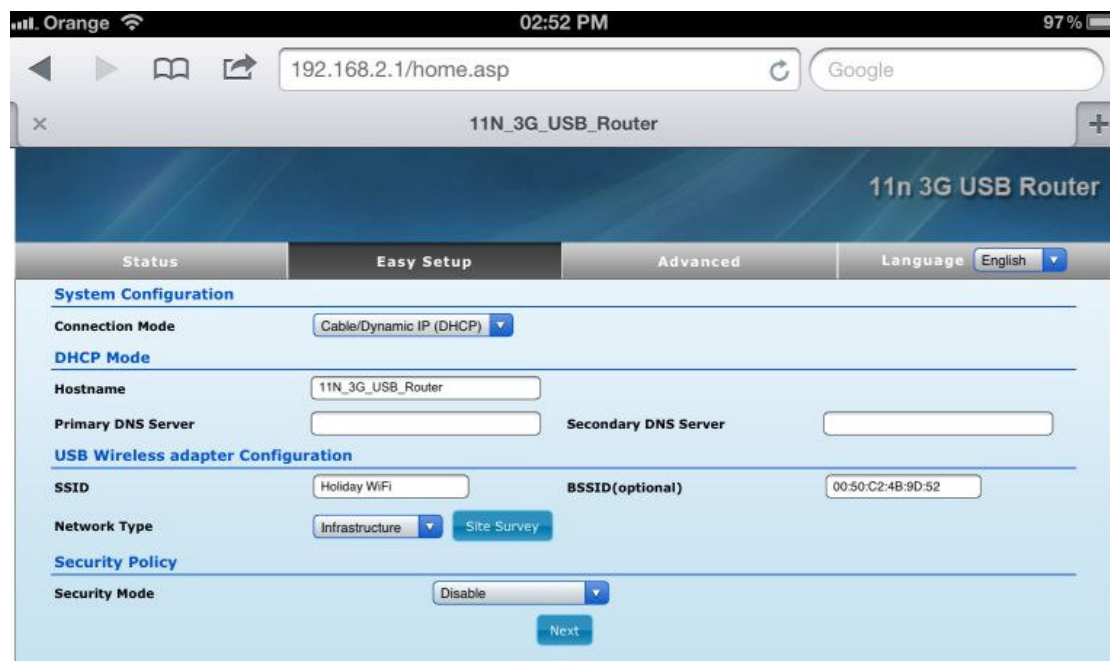

4. In the new page click on “Site Survey”.

5. Another page will open showing the available wireless networks in your area, select the network you wish to connect to, in our case “Holiday WiFi” and click on the “Select” button.

6. If there is a wifi password you will be asked to input it now. If not just click on "Next" on the screen below.

7. On the next screen click on "Done" (below) and that's it, the repeater will reboot, when it's finished you should be able to access the internet.
